# Marine (Construction Grade)

- Exterior
- Hardwood throughout
- Tiling substrate
- Signage & billboards
- All exterior joinery
- Bond Class 3 EN314-2
- EN 636-3
- Service class: 1, 2 & 3

Manufactured from mixed tropical hardwood species which have been carefully selected for their durability and density, Marine Type (construction grade) may be considered for some of the applications in which 3rd Party QA Marine plywood has traditionally been used.

Suitable for structural use in dry, humid and exterior conditions (In exterior conditions protect as recommended by TRADA).

It is an economical option as a substrate for tiles and resilient floor coverings, signage and billboards, show jumping, trailers and exterior joinery. Although manufactured by traditional methods, it is not recommended for use in extreme marine environments (e.g. boat building) due to the absence of 3rd party quality assurance.

## TECHNICAL SPECIFICATIONS

Certification: CE2+

Environmental: EUTR compliant (MYTLAS & PEFC available by arrangement)

Panel Size: 2440 x 1220mm

Available in thicknesses: 12 & 18mm

Glue type: Phenolic Ext EN 314-2 class 3

Boil test: 72 hours

Service class: 1, 2 & 3 (in service class 3 preservative treatment is required to achieve satisfactory performance).
